

We provide a **72-hour** guarantee on the health of our puppies as described below:

These terms refer to Gero or Sharon Bazant (breeder) and

_____ (buyer)

Buyer should have puppy examined by a licensed veterinarian within 72 hours of purchase. If the puppy is found to be ill during such examination, buyer may return it for a full refund. Breeder requires a vet's explanation of the illness. After 72 hours, buyer assumes all responsibility for the puppy, including any medical problems.

We provide a **26-month** guarantee on the puppies as described below:

If the dog is diagnosed with moderate or severe hip dysplasia by a veterinarian certified by the Orthopedic Foundation for Animals (OFA) on or before 26 months of age, breeder will refund buyer's purchase price OR replace the dog with another comparable animal as soon as one becomes available, ONLY if the following criteria are met:

1. The OFA results must be submitted to the breeder.
2. The OFA results must reflect a tattoo or microchip number.
3. The dog must be neutered or spayed.
4. The AKC registration papers must be returned to breeder.

If the dog is diagnosed with Progressive Retinal Atrophy (PRA) by a licensed veterinarian ophthalmologist on or before 26 months of age, breeder will refund buyer's purchase price OR replace the dog with another comparable animal as soon as one becomes available, ONLY if the following criteria are met:

1. The CERF results must be submitted to the breeder.
5. The CERF results must reflect a tattoo or microchip number.
2. The dog must be neutered or spayed.
3. The AKC registration papers must be returned to breeder.

In both cases, the guarantee is null and void, and no money will be refunded if

1. The dog has been used for stud or breeding prior to OFA or CERF testing.
2. The dog is sold or transferred to another owner.
3. The tattoo or microchip number has not been submitted to breeder within 6 months of purchase.

At no time does breeder assume responsibility for veterinary bills incurred for treatment of any medical or genetic condition of purchased puppy.
